**RELEVANT**      **Lucent Technologies**

3 Years

**EXPERIENCE:**      Systems Engineer

- Worked with business clients to create technical Specification documents for several wireless applications using WAP technology and object-oriented technology (C++) on Sun Solaris OS using Oracle databases.
- Provided estimates/intervals for wireless prod management and customer organizations using XP, which was one of the first Agile/Lean processes.
- Defined the work processes and templates used to meet quality objectives and developed new processes to improve efficiency using Function Point Analysis and reduced defects by 30%.
- Drafted presentations/documents for reviews, requirements, training and customer planning sessions.

**US West**

10 + Years

Systems Architect /Systems Analyst/Developer

- Managed the design review process as well as provided direction regarding project selection.
- Directed 8-10 technical teams on projects encompassing all functional application areas of a telecommunications billing system.
- Delivered over 300 software changes in over 50 different software modules.

**Jefferson County Public Schools**

5+ Years

Educator

- Served as an active member of school based teams, resolving scheduling, and cross curriculum issues within the math and special education departments.
- Formulated education plans for a caseload of 25 students with special needs, with input from teachers, parents and students that met the students' needs, as well as provide them the best education possible.
- Received an Integrity Award for Jefferson County Public Schools in 2008 and was nominated again in 2012.
